RE: Medical Imaging Facilities – Saskatoon Health Region / University of Saskatchewan

Medical Imaging in the Saskatoon Health Region provides imaging services for acute and non-acute patients, not only for our Health Region, but also the province. Those services are sub-divided under two departments, Diagnostic Imaging (Medical Imaging) and Nuclear Medicine. Our services include: Bone Mineral Densitometry (BMD), Computed Tomography (CT), Fluoroscopy (FL), General Radiography (X-ray), Magnetic Resonance Imaging (MRI), Nuclear Medicine (NM), Positron Emission Tomography – Computed Tomography (PET/CT), and Ultrasonography (US).

<http://medicine.usask.ca/department/clinical/medical-imaging.php>

The services located at the following locations are:

- RUH – CT, FL, MRI, NM, PET/CT, US, X-ray
- SCH – BMD, CT, FL, MRI, NM, US, X-ray
- SPH – CT, FL, MRI, NM, US, X-ray

For research enquiries and related costs, please contact:

- Christine Dawson
Phone: (306) 655-1829 Email: christine.dawson@saskatoonhealthregion.ca

The Western College of Veterinary Medicine Veterinary Medical Centre's medical imaging department is equipped with the latest medical imaging technologies including:

- digital radiography
- computed tomography (CT)
- ultrasonography
- nuclear scintigraphy
- magnetic resonance imaging (MRI)
