

New University Academic Average (UAA) Calculation

The university academic average (UAA) calculation process will change for the 2022 application cycle.

In all cases, applicants will have approximately 10% of their lowest grades removed up to a maximum of 12 credit units (CU) (90 – 105 CU = 9 CU removal, 106 – 120 CU = 12 CU removal). Degrees must be completed within 5 years.

All calculations are done according to USask credit weightings. A one-term course is equal to 3 CU and a two-term course is equal to 6 CU.

Timeframe	Requirements
Application in the final year of a four-year degree	Applicants must have a minimum of 90 credit units (CU) completed at the time of application and the UAA will be calculated using a minimum of 90 CU, up to a maximum of 120 CU. All course requirements for the degree must be complete by April 30 and the degree must be awarded prior to starting medicine.
Application after you have been awarded a four-year degree	Applicants must have a minimum of 120 CU completed at the time of application and the UAA will be calculated using the most recent 120 CU working from the awarding of the degree back. Any courses taken after the awarding of the degree will not be considered until after an additional degree has been awarded.
Application after you have been awarded an additional four-year degree	Applicants must have completed and have the additional degree awarded prior to application and the UAA will be calculated using the most recent 120 CU working from the awarding of the most recent degree back.
Application with a graduate degree	Applicants will have graduate grades included in the most recent 120 CU used for the UAA calculation. The graduate degree does not need to be completed in order for these grades to count in the UAA calculation. Applicants who have completed a minimum of 6 CU towards a graduate Degree will have an additional 6 CU lowest grades removed from the UAA calculation.
