		Pediatric Surgery		Public Health and Preventive Medicine		
		Vascular Surgery				
		Plastic Surgery				
	Clinical Pharm & Tox					

* This chart assumes a 2-year workshop and preparatory process prior to the launch year of each discipline. A "Go" Meeting is scheduled annually in the spring with the postgraduate deans from each school who collectively confirm that the discipline is ready for launch. This forum allows for programs to identify barricades to implementation and find support and solutions to ensure all schools are comfortable with the targeted launch date. Under special circumstances, disciplines may postpone their launch by one year to allow more preparation time.
