Executive Summary

From the Vice-Dean

This is our sixth report describing the research output of the University of Saskatchewan College of Medicine (CoM). The data were captured, analyzed, and presented by Ms. Shelley-May Neufeld, Research Impact Analyst in the Office of the Vice-Dean Research.

This report focuses on research-active faculty in the CoM and provides bibliometrics and funding data displayed first by college and then divided by department/division/school. The data is presented in descending order by the number of research-active faculty per department/division/school. All information is up to date as of December 5, 2025.

Methodology and Definitions

Research-Active Faculty

This report includes data from **468** identified research-active faculty from **17** departments, schools and divisions. Faculty are considered research active if they have received research funding, published a peer-reviewed publication or have their published works cited (accessible on a current, public [Google Scholar](#) profile) within the 5-year window of this report.

Research FTE

This is the second report to incorporate faculty protected research time. This number includes the research time assigned to USFA and ACFP faculty members, as well as research time designated through leadership or other contracted time. For the 2024/2025 academic year, the college's total research FTE was determined to be **70.44**.

Awarded Research Funding, Research Projects Awarded and Number of Faculty Awarded

Research Funding and Research Projects Awarded data presented in this report were collected from the University of Saskatchewan Data Warehouse and [UView](#) Portal. Data are restricted to funding administered through the University of Saskatchewan and include fiscal years 2021/22 through 2024/25. University of Saskatchewan fiscal years run from May 1 to April 30.

Research Funding and *Research Projects Awarded* include awards, contracts, sub-transfers, travel awards, and awards from other institutions where CoM faculty are Co-Investigators. *Number of Projects Awarded* is the total number of new research projects awarded for a fiscal year, whereas *Number of Faculty Awarded* is the total number of individual faculty members that received research awards.

Bibliometrics: Publications and Citations

Bibliometrics are research productivity indicators based on scientific publications that highlight research productivity and impact. The OVDR recognizes that the bibliometrics used in our analysis do not encompass all research output and do not include important contributions such as community engagement, changes to policy, or clinical practice guidelines.

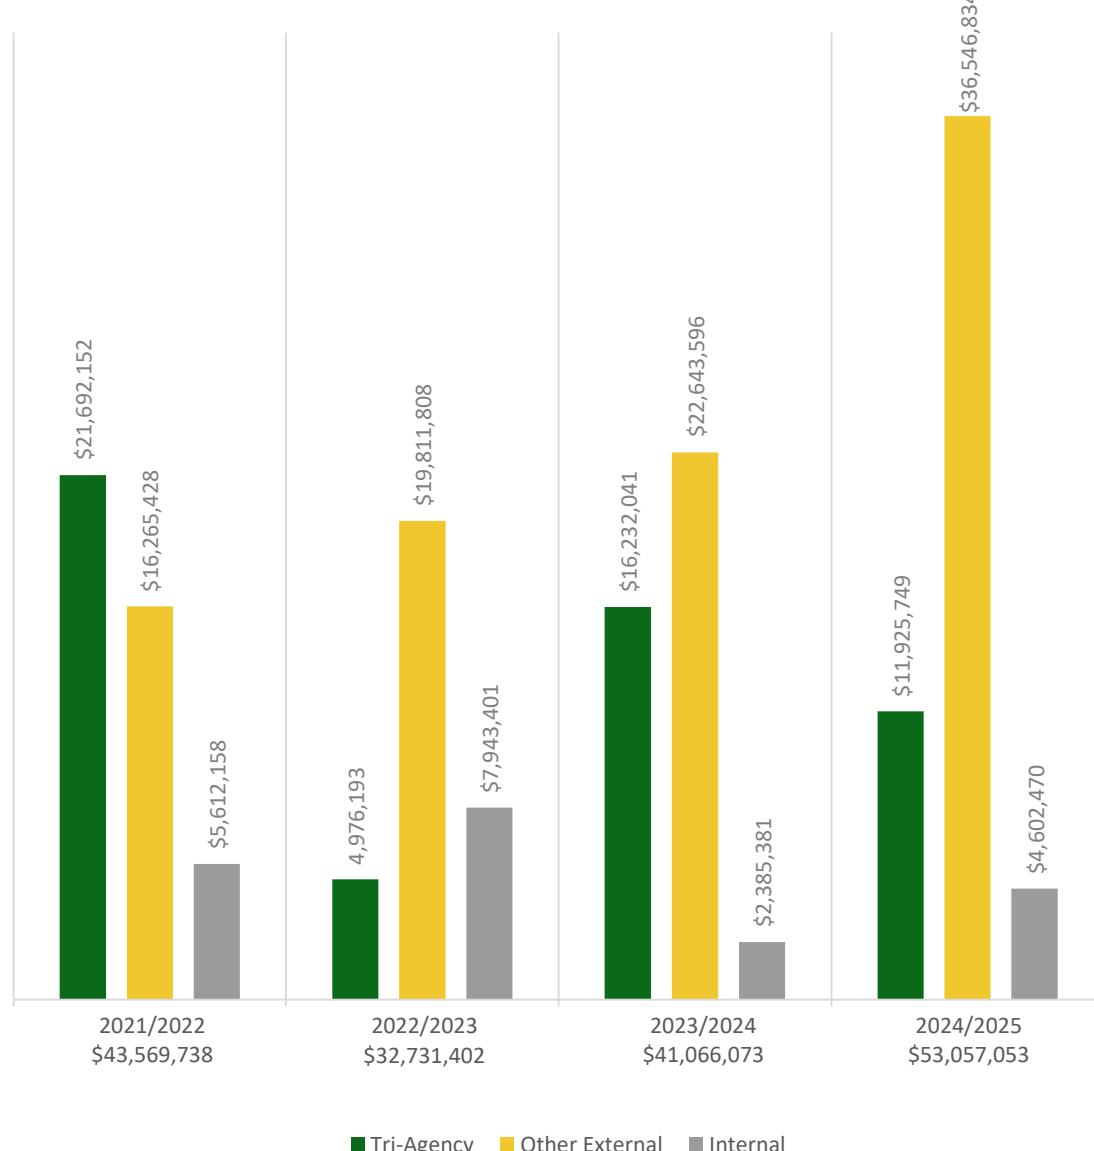

Publication and *Citation* findings presented throughout this report are derived from the Google Scholar profiles of CoM research-active faculty. The report focuses on 5-year publication and citation metrics, quantified on an annual basis by calendar year: January 1 to December 31.
