## Health Sciences 990 Seminar Series

### September 2017 – March 2018

11:30 am- 1:00 pm, dates and locations below

The Health Sciences 990 Seminar Series (HSC 990) exists to connect students and provide them access to a unique assortment of information from authentic research professionals. The series will feature topics such as career development and practical skills, ethics, clinical trials, current research and events, and methodology. The intention of each seminar is to act as a platform and initiation point for questions, discussions and debates. All individuals are welcome, and participation is encouraged. Along with the guest speaker seminars, Health Sciences graduate students will present their current research to their colleagues and peers. Such presentations provide our students the opportunity to demonstrate the diversity of the research within the Health Sciences graduate program, and expand their public speaking skills. Students are encouraged to use their presentation as practice for receiving and managing questions and feedback.

Date	Name	Location
8-Sep-17	Dr. Paul Jurasz, University of Alberta	HLTH B450
4-Oct-17	Tarun Arora and Xin Qin, HSC Graduate Program	HLTH B450
18-Oct-17	Dr. Jack Tuszyński, University of Alberta	HLTH B450
25-Oct-17	Rachel Tang: Collecting and Analyzing Qualitative Data (SSRL)	HLTH B450
8-Nov-17	Nathan Wright and Yanna Ma, HSC Graduate Program	1B03
22-Nov-17	Mahsa Abrishami and Elham Rezaeisarlak, HSC Graduate Program	HLTH B450
17-Jan-18	Jason Disano and Wanda Seidlikoski-Yurach: Key Concepts/Considerations to Planning and Conducting Mixed Methods Research (SSRL)	STA 203
24-Jan-18	Sara Gordon and Cindy Deschenes, HSC Graduate Program	STA 203
7-Feb-18	Luan Chu and Jocelyn Stockwell, HSC Graduate Program	STA 203
28-Feb-18	Dr. Irvin Mayers, University of Alberta	STA 203
7-Mar-18	Sarah Donkers and Upkardeep Pandher, HSC Graduate Program	STA 203
21-Mar-18	Brianna Groot: Intro into Experimental Methods (SSRL)	STA 203
