<input type="checkbox"/> Health Services and Education Research	<input type="checkbox"/> Social/Population Health Research

Definitions: Principal Investigator Category

- **Clinician Career Development:**
 - *The Office of the Vice Dean Research has earmarked funding for clinical faculty members who are new or returning to research and have less than 0.10 FTE (four hours/week) Research Time. Seed funding and funds for planning and pilot work will be available to support studies that improve health or influence practice and health-care delivery.*
 - *The key goals for this funding are: to increase the number of clinical research studies; to increase the College of Medicine success in attracting Tri-Council funding for clinical studies; and to improve the health of Saskatchewan people.*

- **Early Career Faculty:**
 - *Faculty member who, at the time of the application deadline, has assumed their first independent academic appointment (term or tenure track) within the last six years (72 months). The six-year window for being considered Early Career Faculty can be adjusted to account for instances where a researcher has had an institutionally approved delay in research or period of inactivity (e.g., parental, bereavement, medical, or administrative leave). Please contact our office to confirm status. Applicants who have taken leaves of absence may address them in the appropriate section of the CCV.*
 - *Given funding priority to build further research capacity.*

- **General Faculty:**
 - *Primary academic appointment in the CoM.*
 - *Principal Investigators and Co-Principal Investigators are required to make a time commitment of at least 0.10 FTE (four hours/week) Research Time.*

- **Regina Faculty:**
 - *Given funding priority to build further research capacity.*
