

RESEARCH BITE #8

DATE: April 8, 2016

RE: Social Sciences Research Laboratories (SSRL)

Do you need any help designing a survey? Are you missing the software to process your survey data? Do you have interview or focus group recordings in need of transcription? Do you need some specialized help in designing your research methodology? You need to check out the Social Sciences Research Laboratories. The SSRL provides access to specialized research infrastructure (computers, equipment and software) and research space (specific and multi-purpose). Additionally, the SSRL provides access to research supports in the form of specialists with backgrounds and training in specific social science research methodologies (e.g., quantitative and survey research; qualitative research; experimental research; mapping, GIS and spatial analyses).

The SSRL consists of seven research laboratories:

- Experimental Decision Laboratory
- EEG Hyperscanning Laboratory
- Qualitative Research Laboratory
- Spatial Analysis for Innovation in Health Research Laboratory
- Survey and Group Analysis Laboratory
- Social Network Laboratory
- Video Therapy Analysis Laboratory

For more information, please visit their website at <http://ssrl.usask.ca> or contact:
