Thank you for your interest in the College of Medicine at the University of Saskatchewan. We appreciate you taking the time to review this important document. As the only medical school in Saskatchewan, the College of Medicine exists primarily to serve the residents of the province. As such, the vast majority of our seats are reserved for Saskatchewan residents. Our school values diversity and we strive to have an incoming MD class that reflects the diversity of our province. Our Indigenous Admissions Pathway (IAP) is designed to support self-declared First Nations, Métis, and Inuit students from all over Canada to gain admission to Medicine. Our Diversity and Social Accountability Admissions Program provides Saskatchewan residents who have experienced a challenging socio-economic background an opportunity to enter the College. If you are not a Saskatchewan resident, we value the diversity you also bring to the incoming class and we currently have five seats allocated for non-Saskatchewan residents (non-Indigenous).

Please visit our website (www.medicine.usask.ca/admissions) to learn more about our medical school and what we have to offer you as a future medical student studying at Saskatchewan's Medical School. This website will also have information about any proposed and approved changes to future admission cycles.

I. GENERAL INFORMATION

The mandate of the Admissions Committee is to select students who have the academic ability and possess the personal attributes to be successful in our program and in their future careers in medicine.

We feel that students coming into the College of Medicine should have the following personal attributes:

- *communicate well in giving and receiving information*
- *exhibit resiliency, maturity, and be self-directed*
- *have insight and be teachable*
- *be congenial and have excellent people skills*
- *show compassion, empathy, and respect for all*
- *demonstrate ability to lead and advocate*
- *possess integrity and professionalism.*

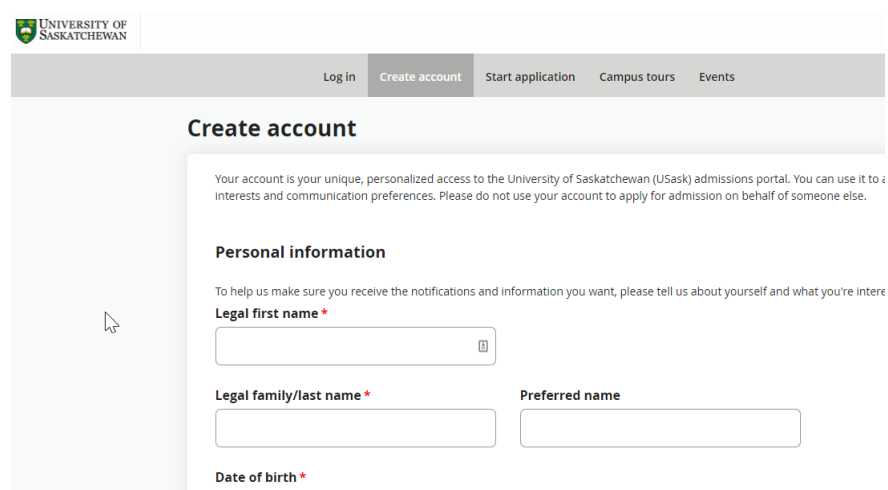

We have a total of 100 seats with four application pools, based on residency and diversity elements, and each pool has its own rank list.

- 1) Saskatchewan Resident (SR) (at least 79 seats)
- 2) Non-Saskatchewan Resident (NSR) (maximum 5 seats)
- 3) Indigenous Admissions Pathway (IAP) (maximum 10 seats)
- 4) Diversity and Social Accountability Admissions Program (DSAAP) (maximum 6 seats-SR eligible ONLY)

II. **NEW!!** APPLICATION PROCEDURES AND DEADLINES

We are launching a **NEW** application system this year! Application to the College of Medicine will now be completed through the University of Saskatchewan Admissions site at <https://apply.usask.ca>.

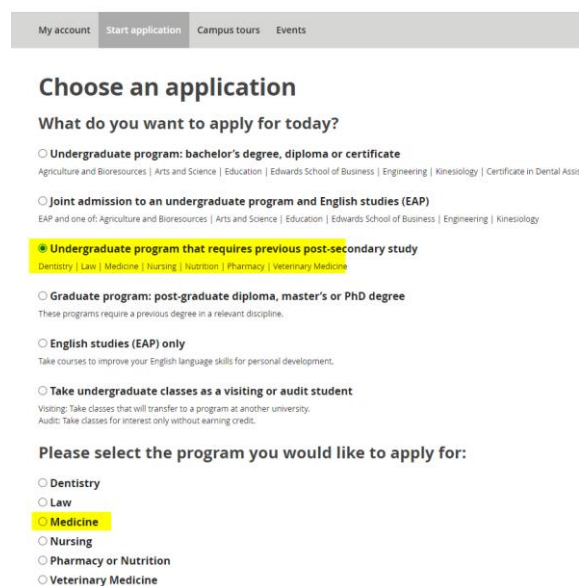

You will need to create an account.

The screenshot shows the 'Create account' page of the University of Saskatchewan Admissions portal. At the top, there is a navigation bar with links: Log in, Create account (highlighted), Start application, Campus tours, and Events. Below the navigation bar, the heading 'Create account' is displayed. A paragraph explains that the account is a unique, personalized access to the USask admissions portal. The 'Personal information' section follows, with a sub-header 'To help us make sure you receive the notifications and information you want, please tell us about yourself and what you're interested in.' The form includes fields for 'Legal first name *', 'Legal family/last name *', 'Preferred name', and 'Date of birth *'. A mouse cursor is visible over the 'Legal first name' field.

You will then get an email from a **Do Not Reply** address to click to complete the setup of your account.

Once you are logged in after you have confirmed your account, you can use Start application to select to start a Medicine application.

The screenshot shows the 'Choose an application' page of the University of Saskatchewan Admissions portal. At the top, there is a navigation bar with links: My account, Start application (highlighted), Campus tours, and Events. Below the navigation bar, the heading 'Choose an application' is displayed. A sub-header 'What do you want to apply for today?' is followed by several radio button options: 'Undergraduate program: bachelor's degree, diploma or certificate', 'Joint admission to an undergraduate program and English studies (EAP)', 'Undergraduate program that requires previous post-secondary study' (highlighted in yellow), 'Graduate program: post-graduate diploma, master's or PhD degree', 'English studies (EAP) only', and 'Take undergraduate classes as a visiting or audit student'. Below these options, a section titled 'Please select the program you would like to apply for:' lists several programs: Dentistry, Law, Medicine (highlighted in yellow), Nursing, Pharmacy or Nutrition, and Veterinary Medicine.

A. The online application will be available in early August. You cannot log back into your application after it has been submitted to make changes to the information you have provided. Any necessary changes must be emailed to the Admissions Office (med.admissions@usask.ca). Correspondence from the Admissions Office will only be sent to the email address provided on the online application; no paper or hard copy will be sent by post. You must ensure the email account provided in the online application is active and routinely checked, including junk/spam folders.

B. The deadline to complete and submit the online application and pay the application fee is October 1, 2021. We will not accept late applications under any circumstance.

C. The non-refundable application fee is \$150.00 and must be paid by credit card.

D. For applicants invited to participate in the Multiple Mini Interview (MMI), there is an additional non-refundable fee of \$75.00 which must be paid at the time of accepting the MMI invitation.

E. Transcripts and any other documents required for application must be uploaded to your application.

F. Deadlines are important, therefore missing a deadline, failing to submit the required supplemental documentation or neglecting to respond to an email requesting information may result in your application being removed from further consideration.

G. You must inform the Admissions Office if you have been subject to any of the following in your current or previous academic program (up until the first day of starting medical school): professionalism review, academic misconduct, non-academic misconduct, or a disciplinary review. Failure to report such misconducts and reviews *will* result in an application being coded inactive.

H. The language of instruction at the University of Saskatchewan is English. Applicants whose primary language is not English may be required to present proof of proficiency in English. Information regarding the English language proficiency requirement at the University of Saskatchewan can be found at <https://grad.usask.ca/admissions/admission-requirements.php#Englishlanguageproficiencyrequirements>.

I. The Admissions Office is available to assist interested individuals who seek information regarding the admission requirements for the College of Medicine. The Admissions Office will not provide specific course(s) of action to follow based on individual circumstances, however we will provide general information about our policies and procedures to assist applicants in making their own choices with respect to the requirements for application to Medicine. The following points require special attention:

- No official of the College can guarantee the admission of any applicant. Admission is determined solely by the Admissions Committee based on the policies set out in this document.
- All admissions inquiries must be submitted via email to med.admissions@usask.ca to appropriately document official communication with the Admissions Office. Therefore, our office will not respond to or communicate with applicants over the phone.
- Any inquiry pertaining to the review and evaluation of a foreign transcript (not including American institutions) **must be** accompanied by a valid Medical College Admissions Test (MCAT) result (i.e., a test written no earlier than January 2018). Foreign transcripts related to study-abroad coursework are not included in this requirement.

III. RESIDENCY AND CITIZENSHIP

You must be a Canadian citizen or have Permanent Resident status by the application deadline of October 1, 2021. Additionally, you must have lived in Canada for at least three years of your life prior to August 1 of the year in which admission is being sought.

Please note, if your Permanent Resident card expires between the application deadline and September 1 of the year of admission, admission to the College will be conditional upon receipt of an updated valid Permanent Resident card by September 1.

Up to five seats may be held by non-Saskatchewan resident applicants.

IV. REQUIREMENTS TO APPLY

1. COMPUTER-BASED ASSESSMENT FOR SAMPLING PERSONAL CHARACTERISTICS (CASPer®)

All applicants are required to complete a current 2021 online assessment, [CASPer®](#), to be eligible for admission. CASPer is an online situational judgement test that assesses for numerous personal and professional characteristics.

The applicant is responsible for booking and taking the CASPer, which includes having access to all of the following:

- AAMC ID
- Government-issued photo ID
- Valid email address
- Working webcam
- Working microphone
- Reliable high-speed internet connection

Please go to www.TakeAltus.com to register your CASPer account and sign up for the **CSP-10201 – Canadian Professional Health Sciences** version of CASPer using a piece of government-issued photo ID and your AAMC ID.

Applicants applying to the College of Medicine at the University of Saskatchewan will be able to select a CASPer test date between August 8, 2021 and October 19, 2021. **Snapshot is NOT required.**

Applicants must make sure to select the **University of Saskatchewan College of Medicine for CASPer score distribution before the posted Distribution Deadline of November 5, 2021.**

For the most up to date information regarding test dates, please check the www.TakeAltus.com website under [Test Dates and Times](#). To account for identity verification and payment processing timeline, ensure that you register for your test at least three days before your preferred test date and time. Last-minute bookings are not recommended. If you require testing accommodations for CASPer, you will need to submit the [Accommodations Request Form](#) signed by you and your qualified professional three weeks in advance of your desired test date. More information regarding CASPer accommodations can be found [here](#).

Please direct any inquiries about CASPer to support@takealtus.com. Alternatively, you may reach out to the CASPer Support Team through the chat bubble in the bottom right-hand corner of your screen on the www.TakeAltus.com website or in your CASPer account.

CASPer typically takes between 75-90 minutes to complete. No studying is required prior to taking the CASPer test, however you are encouraged to familiarize yourself with the test format via the System Requirements Check and 12 section practice test. Additional helpful resources are available free of charge at <https://takecasper.com/test-prep/> and <https://takecasper.com/faq/>. For a more detailed look at the CASPer test, please see this [video](#).

2. ACADEMIC REQUIREMENTS

Non-Saskatchewan resident applicants are required to meet both requirements A and B.

A. Medical College Admission Test (MCAT)

The MCAT must have been written prior to the application deadline of October 1, 2021. You must request that all of your MCAT results be released electronically **specifically** to the University of Saskatchewan, College of Medicine, via the Association of American Medical Colleges (AAMC) MCAT Test Site and **specifically between October 12, 2021 and October 31, 2021**. Even if you have previously released your scores to the University of Saskatchewan, College of Medicine prior to October 12, 2021, you **must again release** them during the above stated time period. **In order to capture all possible MCAT results, only scores released to the University of Saskatchewan, College of Medicine during this time period will be considered.**

The earliest accepted scores for application in 2021 for entry fall of 2022 are from January 2018. **Only the most recent MCAT writing will be considered.** Confidence bands are not considered and any further AAMC adjustments to scores after our MCAT score release deadline of October 31, 2021, will not be considered. The AAMC site will produce a report for applicants showing when scores are released to the University of Saskatchewan, College of Medicine; therefore, we will not confirm receipt of MCAT scores.

Please note that the College of Medicine does not process MCAT results until late November, therefore this item will not be marked as received until the initial review is completed.

For application in 2021 for fall of 2022 entry, non-Saskatchewan resident applicants will be required to have met a minimum total score of 510 with a minimum score of 127 for each of the four section scores.

As we have limited interview spaces, last year the non-Saskatchewan resident minimum MCAT cut score for an interview invitation was a total score of 519. The CARS section score and calculated UAA were then used to break ties for interview wait-list offers.

While no prerequisite courses are required for admission to the MD program, to prepare for the MCAT and to ensure readiness for the concepts covered in the first two years of the undergraduate medical curriculum, applicants are strongly encouraged to complete equivalent/similar courses in the following: Introductory level Biochemistry, Chemistry, Biology, Physics, Statistics, Sociology and Psychology.

Registration for the MCAT is online at www.aamc.org/mcat.

B. Four-Year Baccalaureate Degree Awarded Prior to Entry into Medicine

Calculation of the **university academic average (UAA)** is done in percentages (%). Where transcripts have results in other than %, conversion to % will be done. For more information go to [Conversion Scale](#).

NOTE:

Due to the COVID-19 pandemic, some universities have made the decision to give undergraduate students the option of choosing credit/no credit/pass/fail. We would like to remind you that if you are considering applying to our Undergraduate Doctor of Medicine (MD) program, it is important to carefully consider the admission requirements before making your decision. To maintain your eligibility and to ensure that our admissions policies and processes can be carried out, you must have either letter or numerical grades assigned and posted to your transcript. Exceptions will be granted **only** if the institution did not give students the option of choosing a grade (letter or percentage) for their courses during the COVID-19 period.

Students must have completed a four-year baccalaureate degree (can be in any subject area) prior to entry into Medicine. Non-Saskatchewan residents must have attained a minimum UAA of $\geq 85\%$. All coursework taken up to the awarding of the four-year degree must be completed by the end of April prior to entry to Medicine and in ≤ 5 years since starting university. If a four-year degree is completed prior to application, coursework for the degree must have been completed within a five-year period. The UAA calculation will be based on the evaluation of grades reported on official transcripts from **all accredited degree-granting post-secondary institutions attended** (with the exception of Articulation Agreements), regardless of whether or not transfer credits were awarded, and regardless of the time of year a course was taken.

You are not required to carry a full courseload as long as you meet the stated time requirements. The UAA calculation uses course credit unit weighting and an initial class and a repeated class will both be counted if they fall within the courses used to calculate the UAA.

All undergraduate courses completed at the date of application (if at the time of application, you are in your first four-year degree) or up to award of your most recent undergraduate degree (if the degree was awarded prior to application) will be considered in the calculation of the UAA.

If courses taken after application are required for award of the degree, those courses must maintain an average of $\geq 85\%$.

NOTE: Additional undergraduate level courses taken following the awarding of a degree will only be considered if they will result in a subsequent four-year degree completed by the end of April and that will be awarded prior to entering medical training.

ARTICULATION AGREEMENTS. In the case of a degree resulting from an articulation/partnership agreement between institutions to facilitate transfer of credits and awarding of a four-year degree (i.e., technical school and university), if a block transfer of credit units is noted on the transcript of the receiving institution, then the average of the entire transcript from the technical school will be applied as the average of the block transfer. For example, if an applicant completed a diploma or certificate program from a technical school and then was awarded a block transfer of 60 credit units to be applied towards the completion of a four-year degree, then the average of the entire transcript from the technical school will be used as the average of the block transfer credit. The UAA calculation will then be completed.

PASS/FAIL COURSES. Up to 60 CU maximum of pass/fail grading are allowed within the courses used for the calculation of the undergraduate degree UAA. Any additional pass/fail courses **must be pre-approved by the Admissions Office.**

DISTANCE EDUCATION. Up to 60 CU of distance education are allowed within the courses used for the calculation of the UAA. Any additional distance education courses **must be pre-approved by the Admissions Office.** Degrees obtained by taking entirely distance education classes **will not be accepted.** NOTE: Courses required to be remotely presented due to COVID-19 that are normally presented in a face-to-face format, will be excluded from 60 CU maximum.

WRITTEN SUBMISSIONS. For an individual who does not meet the **time requirements**, the situation must be detailed in writing and submitted to the Admissions Office for consideration. To be dealt with in a timely manner, such submissions must be received by the Admissions Office well in advance of the annual application deadline. Note that no case will be considered with fewer than 102 CU completed prior to the end of December of the year of application or 120 CU completed by the end of April prior to possible entry into Medicine. Some honours, double majors, and/or work-experience or co-op programs will run beyond the five-year period allowed for a four-year degree. Such situations will be handled on a case-by-case basis by the Admissions Office upon receipt of the details in writing.

INTRODUCTORY LEVEL COURSES. Any introductory level courses completed beyond the numerical maximum allowed by the degree granting institution for the four-year degree will not be considered in the calculation of the UAA. Students delaying the completion of a degree by taking additional credit units in junior level courses is discouraged and may result in a file going forward to the Admissions Committee for review.

AP/IB TRANSFER CREDITS. Advanced Placement (AP) and International Baccalaureate (IB) credits can be used towards completion of a four-year degree, but will not be counted towards calculation of an individual's UAA for admission purposes. The start and completion date for AP/IB courses will be as if they were taken during the first year of university.

GRADUATE STUDENTS. Applicants currently enrolled in a post-graduate degree program at the end of the application year will have their UAA calculated with all graduate-level classes completed to the end of December considered if to the applicant's advantage. For applicants who have completed a Master's degree or PhD by the end of December the year of application, 9 or 15 CU worth of lowest marks, respectively, will be removed from their undergraduate degree and the UAA will be recalculated using the most recent 111 CU or 105 CU, respectively. Classes completed after the year-end will not be considered.

ACADEMIC CONSISTENCY. The Admissions Committee may remove a file for further consideration of admission based on (i) an irregular academic record (e.g., grades declining over time, grades fluctuating over a wide range, excessive junior level courses taken in senior years) or (ii) incongruence between the university academic performance and MCAT results.

V. APPLICATION REVIEW PROCESS

- A. CASPer results.
- B. Medical College Admissions Test (MCAT) results are assessed to ensure that (i) the most recent score has been submitted, (ii) the most recent test was written within the required timeline, (iii) the scores met the threshold (cut score) as set by the Admissions Committee.
- C. Proof of residency (Canadian Citizenship, Permanent Resident), four-year degree requirement with required minimum UAA, and academic consistency will be assessed.
- D. As a result of the assessments in steps A, B and C, you can be notified at any time that your application will not proceed further.
- E. Invitations are sent to selected applicants within each applicant pool to participate in our Multiple Mini Interview (MMI) along with a request for references.
- F. Based on performance in the MMI, unsuccessful applicants may be notified that their application will not proceed further.
- G. Interviewed applicants that have met the minimum MMI assessment score are processed according to the criteria applicable to the applicant pool they are in. Interviewed individuals are then informed that they: (i) are being offered a seat, (ii) have been wait-listed, or (iii) will not be offered a seat in the current admission cycle.
- H. Beyond being informed of one of the three outcomes listed in step G, no further information will be provided to interviewed applicants either in writing or through a personal meeting with any member of the Admissions Office, the Admissions Committee, or the College of Medicine Dean's Office.
- I. Confidential information in an applicant's file will not be disclosed to an applicant or anyone acting on the applicant's behalf. Relevant Saskatchewan legislation pertaining to this policy is excerpted as follows.

*The Saskatchewan Local Authority Freedom of Information and Protection of Privacy Act
(1990-91, c.L-27.1, section.30, subsection 3.):*

The (university) may refuse to disclose to an individual personal information that is evaluative or opinion material compiled solely for the purpose of:

(a) Determining the individual's suitability for:

(ii) admission to an academic program;

where the information is provided explicitly or implicitly in confidence.

VI. CRITERIA FOR INTERVIEW OFFER

Your CASPer score and MCAT score (including section scores) will be used to determine if you will receive an interview offer.

Personal qualities are first assessed by CASPer and then through participation in our virtual Multiple Mini Interview (MMI) hosted through the Kira Talent platform. The number of Saskatchewan residents, including Indigenous applicants, and non-Saskatchewan resident applicants invited to interview will vary year by year, depending upon the number of eligible individuals in each applicant pool.

Upon acceptance of an invitation to participate in the virtual MMI, you will be required to pay the \$75.00 non-refundable interview fee by the deadline outlined in the MMI invitation.

Access and Equity Services for the MMI

Applicants who think that they may require an accommodation based on disability, religion, family status, gender identity or any prohibitive grounds in order to participate in the MMI must submit a written request by the date outlined in the interview offer to the Admissions Office (med.admissions@usask.ca) describing the needed accommodation. Note that accommodation for the MMI is not linked to any subsequent need for accommodation should an applicant be accepted by the College of Medicine.

VII. CRITERIA FOR SELECTION

A. Ranking for Admission is Based on Academic Performance and Personal Qualities

Additional documentation such as a CV, research papers, and letters of support will not be considered.

Academic performance for non-Saskatchewan resident applicants is based on the MCAT total and section scores together with a required UAA of $\geq 85\%$ (the UAA does not factor in as it is only a minimum requirement that must be met).

Personal attributes, for all applicants, are assessed first by CASPer and then by the MMI and references.

B. Weighting

Ranking for admission for non-Saskatchewan resident applicants will be based 100% on the applicant's performance in the MMI, as expressed as a z score.

C. Transcripts

ALL applicants **MUST** upload their current unofficial transcript(s) from **ALL** universities and other post-secondary institutions **ever** attended other than the University of Saskatchewan.

If you have just recently enrolled in an institution and no transcript is yet available, you are required to submit a proof of enrollment in place of an official transcript.

Non-Saskatchewan resident applicants participating in the MMI are required to have an official transcript sent as soon as the 2021/22 grades are reported at the end of the academic year (April 2022). If you are currently in a graduate program, we require an additional transcript at the end of Term 1 showing any final grades that were awarded so that they may also be considered in the calculation of the UAA.

Applicants that have been offered admission will be asked to upload an unofficial copy of their final transcript showing the degree awarded AND they must also have an official transcript sent directly from the institution to the College of Medicine, Admissions Office.

All admission offers are conditional upon receipt of an official final transcript showing the degree used in the calculation of the UAA having been awarded. Deadline to receive the final official transcript is June 30, 2022.

Foreign transcripts, if the UAA cannot be clearly calculated on a credit-weighted basis, then the transcript will be evaluated on a case-by-case basis with the Admissions Committee responsible for approval of the applied evaluation process. Transcripts in a language other than English must have an official translation attached. IQAS and WES transcript evaluations will not be considered.

All official transcripts must be sent directly from the institution to the Admissions Office. Transcripts that have passed through the applicant's hands (even if sealed) are deemed to be unofficial and will not be considered. Our preference would be to receive the transcript via email directly from the institution to med.admissions@usask.ca. If your institution does not provide electronic copies of transcripts then please request that an official transcript be sent directly from the institution to the Admissions Office at: Admissions College of Medicine, Box 17 Health Sciences Building, University of Saskatchewan, 107 Wiggins Road, Saskatoon, Saskatchewan S7N 5E5.

D. References/Recommendations

Personal attributes, for all applicants, are assessed in part by information provided by the recommendations from your references. You must provide the names of three references who have supervised you either as a research supervisor or have been your immediate supervisor in recent employment or in a volunteer role. Specifically, if within the last 5 years you have enrolled in or have completed an undergraduate research course and/or a post-graduate program, it is recommended that your immediate supervisor in each case be used as a reference. Employment or volunteer supervisors should be as recent as possible. Your references cannot be a relative or a friend.

Reference/Recommendation feedback is not scored (i.e., the information provided by references is not used in ranking for admission).

The request for References/Recommendations will be sent to applicants at the time of interview offers. Applicants must provide the following information on each reference in your application: First and Last Name; Position (e.g., Professor); Full details of how each reference has supervised you (i.e., their role vis a vis you in an employment, research or volunteer setting); Length of Time Known; Email; and Daytime Telephone.

You need to ensure your references are aware and consent to being contacted by the College of Medicine for a 10-15 minute phone call during April and occasionally early May. Please ensure that you have their correct contact information.

The Admissions Office will email references in late March or early April to schedule the reference call. The number of references contacted is at the discretion of the Admissions Office.

E. File Review for Areas of Concern

The Admissions Committee can refuse admission based on any information within your file and your file starts with your first contact with the Admissions Office of the College of Medicine. The file review is done on all applicants invited to interview, with an emphasis on an applicant's suitability for a career in Medicine. This file review starts within the Admissions Office and then moves to a Standing Committee of the Admissions Committee, with files recommended by the Standing Committee going to the Admissions Committee for a final decision.

When either the Admissions Standing Committee or the Admissions Committee considers files for an applicant's suitability for a career in Medicine, only de-identified information is considered. Common reasons for the Admissions Committee ultimately invalidating an application include evidence of inability to understand and utilize instruction received in written and oral format, academic or non-academic misconduct, misrepresentation on the

application, prior criminal behavior, input from referees, and unprofessional comments and/or behavior during the applicant's participation in our MMI or elsewhere.

If one or more of the above issues is found in a file, the Admissions Committee retains the right to actively seek further relevant information about the applicant, including, but not limited to, the Admissions Office contacting individuals with knowledge of the applicant, whom you may or may not have listed as references.

Academic and Non-Academic Misconduct Check Consent Form

At the time of registration for the MMI, interviewees will be required to sign a consent form allowing the Admissions Office to contact any of the educational institutions they have attended regarding academic and non-academic misconduct on their part. **In submitting an application, you are consenting to the collection of any such supplemental information.**

F. Selection

Candidates for Medicine are selected by the Admissions Committee of the College of Medicine based on the policies outlined in this document, by rank order and by admission pool. The Committee reviews applicants anonymously and all information is de-identified.

G. Outcome

Interviewed applicants will be notified of the outcome of their application by May 31, 2022 at the latest. The Admissions Committee may set a MMI cut score and those interviewees not meeting the MMI cut score will be notified and their application will not be considered further. Applicants that have passed the MMI **will be informed that they: (i) are being offered a seat, (ii) have been wait-listed, or (iii) will not be offered a seat in the current admissions cycle. Decisions of the Admissions Committee are confidential; as such, applicants will not be provided with reasons for the decisions of the Committee.** Applicants placed on a wait-list will be notified about the final outcome at any time up to the first day of Orientation.

H. Selection of Training Site

Starting in 2022, the entire MD program (Years 1-4) will be offered at BOTH the Regina (40 students) and Saskatoon (60 student) campuses. Applicants will be asked to select ONE of the following options at the time of application:

- I want to apply for admission to the Regina campus ONLY
- I want to apply for admission to the Saskatoon campus ONLY
- I want to apply for admission to BOTH the Regina campus AND the Saskatoon campus (NOTE: applicants will have to choose ONE site to attend if accepted for admission at both campuses).

The policies, criteria and process of ranking applicants for admission will be the same at both campuses. Each campus will have a separate admissions offer-list and wait-list. Prior to offers being made, applicants who selected to be considered for BOTH the Regina AND Saskatoon sites will be asked which site is their preferred site. If you are offered a seat in your non-preferred site, you will remain on the wait-list for your preferred site. Accepting the seat at the non-preferred site will still allow you to accept a seat at your preferred site if a seat becomes available.

To ensure diversity at each campus, a 60:40 ratio of the different applicant pools will be maintained at the Saskatoon and Regina campuses, respectively.

NOTE: Applicants that are granted a one-year deferral will retain the site they are assigned at the time of the deferral being granted.

I. Acceptance Deposit

Applicants who are offered admission must pay a non-refundable deposit of 10% of the tuition <https://students.usask.ca/money/tuition.php> by the deadline date of the acceptance of the offer. Candidates that withdraw their admission acceptance after paying the fee will forfeit the deposit.

VIII. STUDENTS WISHING TO TRANSFER

The College of Medicine at the University of Saskatchewan does not accept students wishing to transfer from another medical school into our program.

A Canadian citizen or permanent resident of Canada currently enrolled in another medical school who wishes to attend the College of Medicine **MUST** apply through the regular admissions process.

In compliance with the university-level Articulation and Transfer Credit Policy, the College of Medicine reserves the right to approve or deny requests for transfer credit or advanced standing in the Undergraduate Medical Education program (see <https://medicine.usask.ca/policies/transfer-student-policy.php>). **Requests for transfer credit or advanced standing will only be considered on a case-by-case basis post-admission to the Doctor of Medicine (MD) program at the University of Saskatchewan.** The process to determine transfer credit(s) may result in a cost incurred by the student.

IX. ESSENTIAL SKILLS AND ABILITIES REQUIRED FOR THE STUDY OF MEDICINE

Applicants must familiarize themselves with the *Essential Skills and Abilities Required for the Study of Medicine* to determine if the practice of Medicine is possible as a career. Details are found at <https://medicine.usask.ca/policies/com-technical-standards.php>.

Applicants who potentially would require an accommodation during their undergraduate study of Medicine are encouraged to register with Access and Equity Services at the time of acceptance as entry into the program may need to be delayed to ensure proper development and implementation of an accommodation plan. Please also contact the Office of Student Affairs for the College of Medicine regarding your request for an accommodation at med.studentaffairs@usask.ca.

X. BACKGROUND CHECK

Applicants to the College of Medicine will be required to answer the following questions on the application form and provide detailed information for any question(s) answered “Yes”:

- *Have you ever been suspended, disqualified, censured, or had any disciplinary action taken against you as a member of any profession?*
- *Have you at any time been (i) subject to allegations of any academic or non-academic offence by a post-secondary institution, (ii) suspended, expelled, required to discontinue, or otherwise disciplined (including being denied readmission) for any academic or non-academic offence by a post-secondary institution, (iii) subject to informal resolution with respect to any academic or non-academic offence by a post-secondary institution, or (iv) cited for any professionalism issues at any time?*
- *Have you ever been convicted of a criminal offence (this includes any offence for which pardon has been received)?*
- *Have you been arrested or charged with any criminal offence, in Canada or elsewhere?*
- *To the best of your current knowledge and belief, are you currently under investigation for possible criminal conduct, in Canada or elsewhere?*

Note: If during the application cycle, anything changes in regards to how you answered the questions at the time of application, you are responsible for **immediately** notifying the Admissions Office (med.admissions@usask.ca).

All applicants accepting admission will be required to immediately request a criminal record check, including vulnerable sector screening, and submit the official results to the College of Medicine by the first day of Orientation of the year of entry. You should familiarize yourself with the Criminal Record Check Policy and Procedures document <http://medicine.usask.ca/documents/Admissions/CriminalRecordPolicy.pdf> under the Applicant Information Section. Positive results will be shared, including sharing a copy of the documentation, with: (i) the College of Physicians and Surgeons of Saskatchewan and (ii) other medical and/or educational institutions as required. In the event that you are found to be ineligible for an educational licence from the College of Physicians and Surgeons of Saskatchewan, the offer of admission will be revoked.

If you are a future applicant considering application to the U of S College of Medicine and answer *yes* to any of the preceding questions, you should contact the Admissions Office to have an informal review of the details of your background completed to determine future concerns for admission or licensure as a medical student.

XI. THE ADMISSIONS COMMITTEE

Selection of students for admission to the College of Medicine is the responsibility of the Admissions Committee. The Committee consists of the follow members (18 with vote):

- Chair (Director of Admissions)
- Dean of Medicine's Designate
- Director of Northern Medical Services
- Seven Faculty Members
- Faculty Member/Site Director - Regina Campus
- Three undergraduate medical students (one representing each – Year 1, Year 2, and Year 3)
- College of Medicine Indigenous Coordinator
- The Dean or Designate of the Faculty of Science, University of Regina
- Two general public representatives - appointed by the Saskatchewan Urban and Rural Municipalities Associations, SUMA and SARM, respectively
- Representative, Student and Enrolment Services Division, University of Saskatchewan (non-voting)
- Administrative Coordinator - Admissions (non-voting)
- Program Manager - Undergraduate Medical Education (non-voting)

XII. ADMISSIONS APPEAL PROCESS

NOTE: Applicants will have 5 business days from the date a negative application decision is emailed to launch an appeal of that decision.

The Admissions Appeal Committee will review and decide upon applicant appeals of decisions made by the Admissions Committee. If you appeal, your appeal must include the completed and signed Appeal Form <http://medicine.usask.ca/admission-to-the-md-program/how-to-apply.php#AppealAdmission>. The appeal form and any supporting documentation must be submitted to the Chair of the Admissions Appeal Committee by email to med.admissions@usask.ca on or before the 5 business day deadline.

As outlined in the Policy on Admission to Degree Programs (<http://policies.usask.ca/policies/academic-affairs/policy-on-admission-to-degree-programs.php>) - Admission Decisions - Appeal of Admission Decisions, ratified by University Council on May 1, 2012 - “Grounds for an admission appeal shall be limited to: (1) unit procedural errors, (2) evidence that the information used in the assessment of the decision was wrong or incomplete, or (3) evidence that the assessment was not made according to the published admission qualifications and selection criteria. A failure by the applicant to provide accurate and complete information in accordance with the established admission qualifications and selection criteria shall not be grounds for an appeal. The decision of the Appeals Committee is final and no further appeal procedure will be entertained.” Any appeal launched must specify the ground(s) the appeal is based on to be considered further by the Admissions Appeal Committee.

XIII. ESTIMATE OF EXPENSES RELATED TO MEDICAL EDUCATION

	Year 1	Year 2	Year 3	Year 4
(Number of Months)	9	9	12	8
Tuition (2021-22)	\$18,718	\$18,718	\$18,718	\$18,718
