7. Evidence of reflective practice		
<i>When completing the CSR below, please refer to the list of CSR questions.</i>		

When learners are asked to present a patient case to you in a teaching session, or when you are asked as a resident to present to your supervising physician, the following chart may help you adopt a more evidence-based approach using the Patient Centred Clinical Method. Various approaches to case reports can be taken depending on the scenario (such as handover, rounds, teaching sessions) or depending on the teaching approach used such as the CSR or SNAPPSS, etc.
